WORK EXPERIENCE

Software Engineer Intern | Internship *Jan 2026 – Jun 2026*
Synodica Solutions Pvt. Ltd. — Hybrid, Surat

- Architected and shipped a production-grade Next.js web application with optimized SSR/SSG/ISR rendering, improving page-load performance and SEO discoverability.
- Enhanced transaction security and user experience by integrating OTP-based authentication and real-time order-status tracking.

Technologies/Skills Used: *Next.js, React, TypeScript, Tailwind CSS*

PROJECTS

User Management System | Full-Stack RBAC Platform *May 2026 – Jun 2026*
Links: GitHub | Website

- Designed a full-stack MERN RBAC platform, ensuring strict data isolation across 15+ API endpoints for three distinct user roles: Admin, Manager, and User.
- Secured against unauthorized access using JWT and bcrypt authentication, implementing token validation, 30-minute session timeouts, and automatic lockout for inactive users.
- Achieved 100% action traceability by developing an admin dashboard featuring user lifecycle management, advanced filtering, and audit logging.
- Improved admin control with a heartbeat-based session monitor for live user tracking and instant remote JWT/session invalidation.

Technologies/Tools Used: *MongoDB, Express.js, React.js, Node.js, JWT, bcrypt*

Zirwa Qurbani Service | Full-Stack E-Commerce Platform *Mar 2026 – May 2026*
Links: GitHub | Website

- Developed a full-stack booking platform for 500+ concurrent users, enabling slot-based order management and a multi-step checkout process using Next.js App Router.
- Reduced manual order processing by ~40% through a real-time order tracking system featuring a custom discount engine and automated invoice generation.
- Achieved a 95+ Lighthouse performance score across 10+ pages by creating a responsive Tailwind CSS UI with 40+ reusable TypeScript components.
- Translated Figma design systems into pixel-perfect, responsive Next.js pages, ensuring UI/UX consistency across the platform.

Technologies/Tools Used: *Next.js, React, TypeScript, Tailwind CSS*

AI-Based Invoice Generator *Sep 2025 – Oct 2025*
Links: GitHub | Website

- Reduced manual invoice creation time by ~70% by designing and building a full-stack AI-powered invoice generation system integrating the Gemini API.
- Achieved 90%+ field-extraction accuracy by implementing an AI-driven document data-extraction and validation pipeline.
- Enabled secure invoice operations by building 10+ REST API endpoints with JWT authentication and role-based access control, deployed on Vercel with CI/CD via GitHub for 99% uptime.

Technologies/Tools Used: *React, Node.js, Express.js, MongoDB, Gemini API*
